

**Remarks:**

This Amendment is intended to put the U.S. national phase filing of the above identified International patent application in good form for allowance as a U.S. Patent.

**The Specification**

Applicants have amended the specification to conform to usual U.S. practice. No new matter has been added.

**The Claims**

Applicants have amended claims 1-9 into a form more usual and acceptable under U.S. patent practice. Applicants add the new claims 11 and 12 to rewrite the originally filed claim 10, now herein cancelled, into a form more usual and acceptable under U.S. patent practice. Applicants further add new Claim 13 to resolve what would otherwise be considered an improper multiply dependent claim. The subject matter for the claim amendments can be found in the originally filed claims and in the specification as filed. Accordingly, no new subject matter has been added.

The application is now deemed to be in condition for allowance and notice to that effect is solicited.

**CONCLUSION**

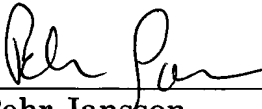

It is submitted that all of the claims now in the application are allowable. Applicants respectfully request consideration of the application and claims and its early allowance. If the Examiner believes that the prosecution of the application would be facilitated by a telephonic

interview, Applicants invite the Examiner to contact the undersigned at the number given below.

Applicants respectfully request that a timely Notice of Allowance be issued in this application.

Respectfully submitted,

Date: 12/16/2005
